

The **TB15** has been designed to fit between the seats of motor vehicles. It can also be placed on the backseat of a motor vehicle or in the rear of the vehicle where a cigar lighter plug is available. Supplied with carry strap.

TB 15

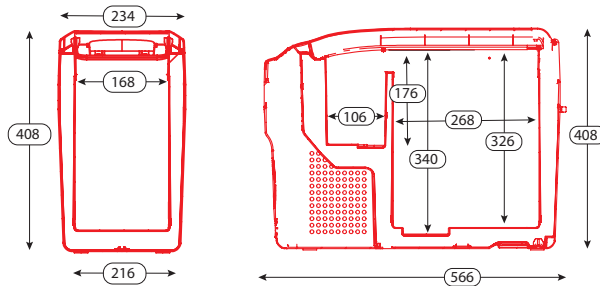

Number of cans	-	20
Thermostat Range	-	18°C to -24°C
Weight (Kg)	-	8.2
Baskets	-	No
Size (LxWxH)	-	566x234x363
Settable Cut-Out	-	No
Volume (Ltr)	-	15.0
Power	-	12/24Vdc only

The **TB18** has been designed to fit between the seats of motor vehicles. It can also be placed on the backseat of a motor vehicle or in the rear of the vehicle where a cigar lighter plug is available. Supplied with carry strap.

TB 18

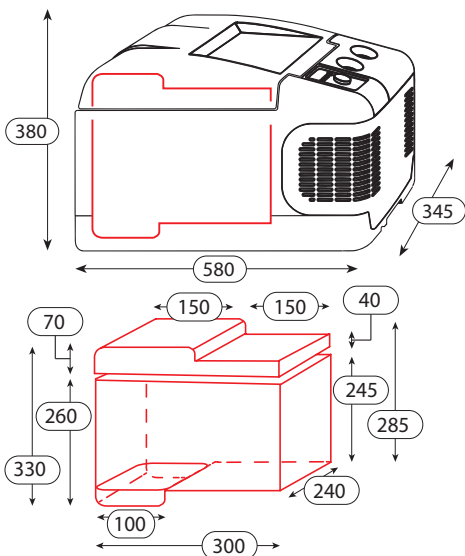

Number of cans	-	25
Thermostat Range	-	18°C to -24°C
Weight (Kg)	-	8.6
Baskets	-	No
Size (LxWxH)	-	566x234x408
Settable Cut-Out	-	No
Volume (Ltr)	-	18.0
Power	-	12/24Vdc only

The **TB26** has been designed to fit between the seats of motor vehicles with convenient cup holders. It can also be placed on the backseat of a motor vehicle or in the rear of the vehicle where a cigar lighter plug is available.

TB 26

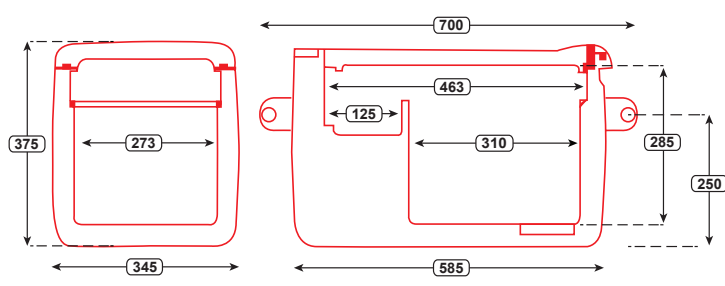

Number of cans	-	37
Thermostat Range	-	4°C to -24°C
Weight (Kg)	-	16
Baskets	-	No
Size (LxWxH)	-	580x345x380
Settable Cut-Out	-	No
Volume (Ltr)	-	24.6
Power	-	12/24Vdc only

This range of fridges has specifically been designed to offer the user a compact but effective fridge for all mobile applications. They are manufactured to the highest standard utilising a high impact plastic which offers a lightweight and robust design. The carry handles are designed to be removed should the user wish to position the fridge in a very small area. Designed to operate at 32°C ambient temperatures, these units can maintain freezing temperatures of between -6°C to -12°C.

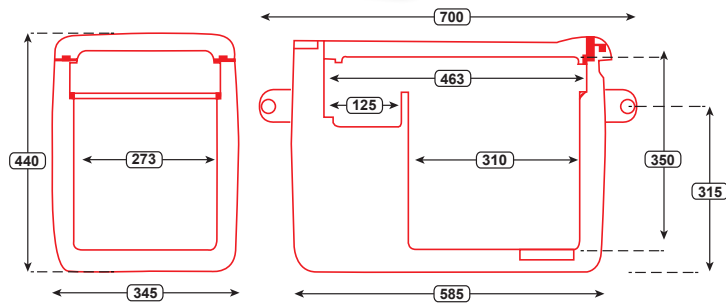

TB 31

Number of cans	-	47
Thermostat Range	-	18°C to -24°C
Weight (Kg)	-	16
Baskets	-	Yes
Size (LxWxH)	-	585x345x375
Settable Cut-Out	-	Yes
Volume (Ltr)	-	28.7
Power	-	12/24Vdc
	-	110/230Vac

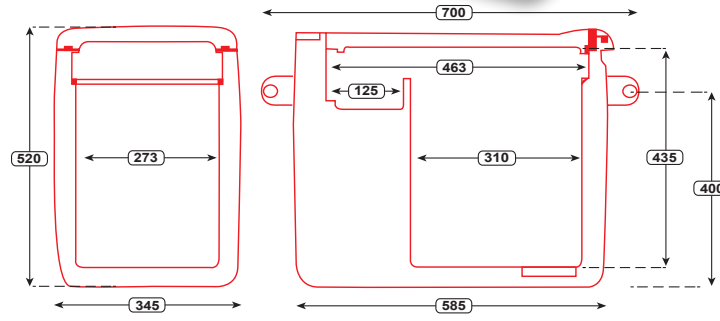

TB 41

Number of cans	-	67
Thermostat Range	-	20°C to -30°C
Weight (Kg)	-	17
Baskets	-	Yes
Size (LxWxH)	-	585x345x440
Settable Cut-Out	-	Yes
Volume (Ltr)	-	36.8
Power	-	12/24Vdc
	-	110/230Vac

TB 51

Number of cans	-	79
Thermostat Range	-	20°C to -30°C
Weight (Kg)	-	18.5
Baskets	-	Yes
Size (LxWxH)	-	585x345x520
Settable Cut-Out	-	Yes
Volume (Ltr)	-	46.5
Power	-	12/24Vdc
	-	110/230Vac

The company is the largest manufacturer of mini-bar and 12volt refrigeration in the world. It specialises in the following industries.

- Hotels
- Trucks
- Caravans
- Mobile camper vans
- Yachting and boating industries
- General camping

Over the past years a greater demand evolved for mobile refrigeration needs for use in camping and motor vehicles. (This resulted in the development of new models).

**PRODUCTS ARE AVAILABLE
AND SERVICED WORLDWIDE**

NATIONAL LUNA is the importer and distributor for the full range of products in South Africa and offers a 3 year warrantee and back-up service.

www.nationalluna.com

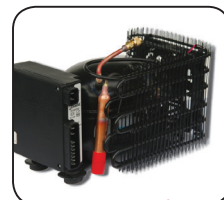

NL - Sept 1 2015 - IndelB-TB - R

INDEL B MANUFACTURES A RANGE OF OVER 140 DIFFERENT 12VOLT BATTERY OPERATED FRIDGES AND DISTRIBUTES THESE WORLDWIDE FROM IT'S FACTORY BASED IN ST. AGATA, ITALY. SOME OF THESE FRIDGES ARE IDEALLY SUITED FOR THE SOUTH AFRICAN CAMPING AND OUTDOOR MARKET WHERE RUGGED CONDITIONS DEMAND TOUGH CONSTRUCTION, HIGH EFFICIENCY AND LOW POWER DRAW.

QUALITY IS GUARANTEED FROM DAY ONE, AND WITH TOUGHER MATERIALS, ADVANCED MANUFACTURING TECHNIQUES, AND SUPERIOR COMPONENTRY, ALL INDEL B FRIDGES CARRY A COMPREHENSIVE THREE-YEAR WARRANTY.

ADVANCED COMPRESSOR TECHNOLOGY

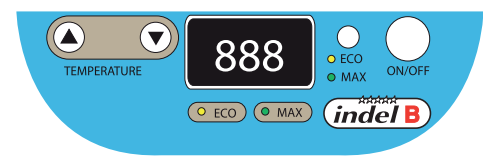

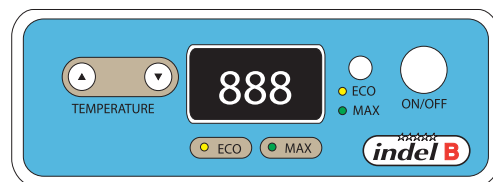

All models are fitted with the new advanced Danfoss DC/AC electronic power supply with automatic switching as standard. The fridge/freezer will operate at 12Volt dc, 24 Volt dc, as well as AC voltage ranging from 100 to 240 volt.

Danfoss designed BD35F compressors are used to ensure field servicing and parts availability.

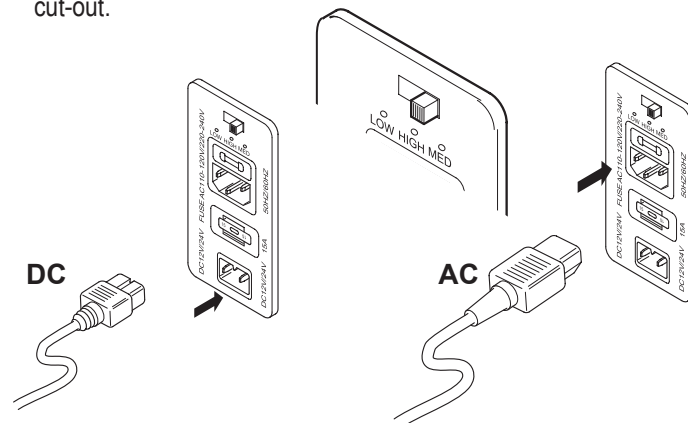

INTELLIGENT CONTROL

Equipped with an easy-to-read digital thermostat, the programmable intelligent controller allows you to set the exact temperature you want, shows you the current bin temperature, and gives you the option of manually selecting high-speed mode for even faster cooling.

LOW VOLTAGE CUT-OUT

To prevent excessive discharge to your battery, all fridges have a low voltage cut-out. Some fridges incorporate battery protection circuitry which allows the user to select the desired low battery cut-out.

The refrigerator is provided with an automatic switch-over from DC to AC. Should both mains and DC be present at the same time the device will automatically select mains power input.

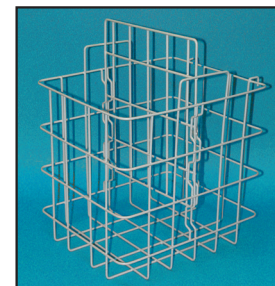

BOTTLE SELECTION AND CAN CAPACITY GUIDE

330ml 750ml 2 Litre

The three icons guide the user as to which fridge model is the best match for their needs regarding bottle and 330ml can holding capability.

REMOVABLE BASKET WITH DIVIDER

The TB31, TB41 and TB51 are fitted with a removable basket and has a convenient divider as standard equipment.

The basket can be removed and placed in a household fridge or freezer to precool goods prior to your trip.

PROTECTION JACKET

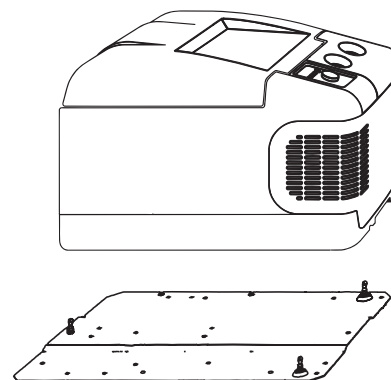

An optional protection jacket is recommended for general use

This jacket will protect the fridge from scratching and keep harmful African ultra-violet sunlight from damaging the plastic components.

OPTIONAL BASE MOUNTING PLATE

An easy mounting base has been designed to simply and securely 'clip' the fridge into place. (Suits the TB26, TB31, TB41 and TB51 models only).

NOTES

Portable Refrigeration
